Project planning notes

Text-only control | Selectable text and vector rules

Purpose

This short document is a control sample for compression. It contains selectable text and simple vector rules, with no embedded photographs or scans.

Scope

The fictional project is a student reading group. Its aim is to discuss research methods, prepare a short summary and keep a clear record of decisions.

Planning

Set a meeting date, choose one article and write three discussion questions. Assign a volunteer to record the main points and the next agreed action.

Review

Check that the summary distinguishes observations from interpretations. Correct unclear statements and record any questions that remain unanswered.

Expected compression behaviour

Text-only PDFs are often already small. An image-focused compressor may leave this file unchanged. No reduction is a valid result and must be reported honestly.

Selectable text check: Reference ALPHA-2026, total 1,024, rate 10.5%, value 0.001.
